

Invitation to Seminar

We invite you to join us for two presentations from our experts.

GMO Cargo Contamination - What can be done?

Our scientist, Tim Moss, will discuss what a GMO cargo is, why it has recently come under scrutiny in shipping and what can be done to mitigate the issues.

Post Incident Container Inspections

Our master mariner, Graham Hill, will give a presentation based on his experience of the practical difficulties encountered when inspecting containers and cargo damaged during fires, flooding, collision and container collapses.

(Due to business commitments the presentation topic may change at short notice.)

When: **Thursday, 03 Nov 2016**

6:00 to 10:00pm

Where: **The Gun Room**
