M.P. has experience in marine shipboard operations up to the rank of Chief Engineer on Bulk Carriers, Tankers, Turbine Steam ships, Ro-Ro's and Self-Unloading Bulk Carriers. From 1996 he worked in Drydocks World, Dubai as Ship Repair Manager on all kind of merchant vessels as well as dredgers, fishing trawlers, offshore support vessels, diving support vessels, Jack Up Drilling Ships and passenger vessel. From 2000 he was leading the Production Control team in charge of safely dry-docking ships and rigs. His job entailed carrying out safety and quality audits, risk assessment, incident investigation, yard development and ensuring a safe quality assured operation in the shipyard. He was the first Conversions Manager and has carried out multiple MOPU, FPSO and FSO conversion projects.

As Newbuilding Director, he has led a team of 2000 people for more than 5 years. He was responsible for Engineering Dept., Fabrication and Outfitting Depts. and Project Management. Successfully completed 2 semi-submersible hulls, 8 Seismic vessels for Polar regions, GBS tank and HVDC platforms for wind farm projects. He has hands on experience of heavy lifts to 8,000T, loading project cargoes on semi-submersible heavy lift vessels, insurance and warranty claims, contract and commercial negotiations of projects and financial restructuring of shipyards. Worked in shipyards in middle east, Singapore, China, USA and has wide network of contacts in Europe and worldwide. Carried out cargo damage claim surveys, due diligence audit for Newbuilding of a ship. Investigate and estimate damage claim in surge incidents, container damage and pollution incidents, main engine breakdowns, personal injury cases, and ship-repair claims.
