

Marine Coating Services

Marine Coating Services

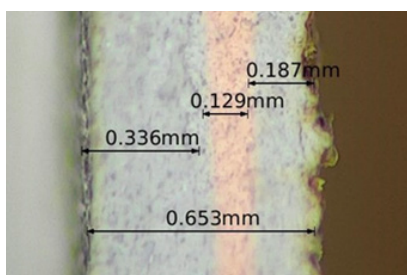

Our International Coating Scientists have years of experience working in the marine sector, delivering independent advice to clients that complies with current legislation thus reducing maintenance costs and extending asset lifetime.

Working 24/7 our services include:

- Coating failure investigations and analytical services:
 - Internal tanks – chemical, product, crude oil, water ballast, grey water, potable water, mud and slop
 - Cargo holds
 - External hull and antifouling paints
 - Above water areas, decks, superstructures and accommodation
- Vessel surveys
- Expert advice on M&R / New Building coating specifications e.g. newly installed scrubbers
- Coating formulation recommendation, certification and laboratory testing
- Expert advice on substrate preparation and coating application
- Paint training courses
- Expert opinion
- Expert witness in legal disputes
